Work Experience

March 2026 – Present | Lead Software Engineer | Prudential Financial, Newark NJ

- Created Claude skills to automate the release management process of 12 repos and remediate Apiiro security vulnerabilities from hours to minutes; presented to the wider developer community and received praise from team members and leadership
- Presented a talk on getting AWS certified at Prudential to 200+ attendees in collaboration with the cloud team
- Recorded training videos to help onboard team members to new technologies like Kong and Dynatrace
- Led modernization projects by aligning the TypeScript architecture, type safety, and unit testing best practices upfront with the team
- Optimized DocumentDB performance by 10x by creating indexes for common queries
- Cleaned up unused Unleash feature flags, Git feature branches, & reduced tech debt every quarter during IP sprints, cleaning up 1000+ lines of code

April 2024 – March 2026 | Senior Software Engineer – Prudential Wealth Advisors Connect | Prudential Financial, Newark NJ

- Developed a web app used by 5K+ financial advisors using a MERN stack and deployed on AWS
- Implemented an AI smart chat using WebSockets to allow advisors to ask questions and receive responses in real-time
- Improved performance by 4x by monitoring API performance in CloudWatch/Splunk/Dynatrace, optimizing API calls, caching data, and decoupling legacy services, in collaboration with product owners, tech leads, and solutions architects
- Transferred 100K+ consolidated overviews to LPL Financial via 7 daily cron jobs using S3, Lambda, EventBridge, and DocumentDB, ensuring the process was secure, compliant, and resilient against failures
- Mentored 6 junior developers to help them work more independently, test & document changes, and participate in code reviews

August 2023 – April 2024 | Senior Software Engineer – Stages for Retirement | Prudential Financial, Newark NJ

- Created a form generator using React and Formik that lets developers dynamically generate 17 forms based on JSON payloads and can be updated automatically to stay compliant
- Used the form generator to create a 16-page application using Nx, React, TypeScript, Jest, SCSS, and Storybook to recommend insurance policies and connect customers with advisors
- Fixed bugs & ADA defects in Prudential Stages for Retirement to improve the user experience and make it more accessible
- Utilized CI/CD pipelines in Jenkins and CloudBees that run unit & security tests (SonarQube, Checkmarx), build Docker images, and deploy them on an ECS Fargate container in AWS, improving performance by 50%

November 2022 – August 2023 | Software Engineer | Prudential Financial, Newark NJ

- Integrated CI/CD pipelines for 12 mobile apps & frameworks using Jenkins, Fastlane, SonarQube, and Checkmarx that reduced code smells & vulnerabilities and improved testing & deployment times by 50%
- Published 200+ pages of technical documentation on Teams and Confluence with 3500+ views to help improve the developer experience
- Created an iOS authentication app using AuthHub that utilized biometrics, SMS/email OTP, and risk evaluation in an OIDC Authorization Code Flow with PKCE
- Developed 4 starter templates for iOS & Android to help improve time-to-market while following best practices for CI/CD automation, Artifactory integration, Dynatrace monitoring, and building for different environments

July 2021 – November 2022 | Associate Mobile Developer | Prudential Financial, Newark NJ

- Migrated 7 mobile apps used by 1500+ employees from MobileIron to Intune to streamline mobile device management across the enterprise

Education

Master of Science | Rutgers University – New Brunswick

- Concentration: Software Engineering

Bachelor of Science | Rutgers University – New Brunswick

- Major: Computer Engineering, Minor: Computer Science
- Graduated Summa Cum Laude

Additional

Skills: iOS Development (Swift), Android Development (Java, Kotlin), Web Development (HTML, CSS, JavaScript, TypeScript, React, Angular, Node.js), Engineering, Python, Git, Linux, Test-Driven Development, Agile, DevSecOps, Jenkins, AWS (S3, Lambda, DocumentDB, EventBridge, SQS, CloudWatch), MongoDB, Firebase, Accessibility, Problem Solving, Communication, Collaboration, Continuous Learning

Certifications: AWS Cloud Practitioner, AWS Developer Associate, AWS Solutions Architect Associate, AWS DevOps Professional
